

MEMORANDUM

To: File

From: Randy Lyman

Date: July 29, 1998

Subject: Multifoods/Penske Leasing

On July 7, 1998 at 1:55 p.m., I returned Andrew Cullen's call of Penske Truck leasing (610-775-6406) for multifoods on W. Maple. They are continuing to dispose of truck washing waste on-site until something is permanently built. He said he will send a letter updating the time-frame for getting a permanent structure built.

From: Randy Lyman

Date: July 29, 1998

Subject: Multi foods/Penske Leasing

On July 7, 1998 at 2:05 p.m., I called back Bob Still of Multi foods, (831-8002). His voice message indicated he wanted to talk about the various options for handling the washing of trucks and whether they should build or not. He was out to lunch, but is to return my call this p.m.

On July 7, 1998 at 5:10 p.m., I talked with Bob Still. They are looking at \$100,000.00 to cover and improve their washing facility. They explored using Kearney St. or XXVII wheeler truck washes, but getting the trucks there is a problem, scheduling, driver, etc. Mr Still asked if we would be "on their back" to cease using their old "septic and leach field" system. I told him that we are responsible for what goes to the sanitary sewer in the County, but we won't be doing any enforcement out there regarding non-sewer uses or processes, etc. that do not contribute to the sanitary sewer. I told Mr. Still and Mr. Cullen that we would work with them on "temporarily" pumping truck wash water to their sanitary connection for the offices etc. so long as they are working on a long term solution.
